Hey BHADRI,

Saw that you recently applied to our platform Shipd.ai. Would love to tell you about a new project we just launched!

(In case you applied and forgot about it - Shipd is a coding platform that pays you to write/solve problems that we use to train AI models).

Introducing the Medley quest! Here's what this project is all about:

- This quest involves the creation and solution of real-world software engineering problems (i.e. problems you'd encounter on the job or see on StackOverflow)
- The languages you can use are: C++, Java, JavaScript, or Bash
- The project started yesterday and will go on for 6 more days.
- You will be compensated well for contributions to this project!

We're recruiting for 12 more spots on this quest and expect to fill it by tomorrow night.

Let me know if you're up for the task and I'll send more info! Looking forward to having you on this quest :)

Cheers,

Serena Ge

Thank you for reaching out! I'm excited to hear about the Medley quest and would love to contribute. I've already completed my application on the Shipd platform and am awaiting a response. Could you please share more details about the tasks involved and the compensation structure?

Looking forward to hearing from you.

Best regards,
Bhadri

Hey Bhadri,

Love to hear it! Compensation is paid per problem/solution and is based on factors like complexity of your submission.

The next step is a trial where you create 1 problem, paid for if you're accepted. We'll be able to give you ranges for compensation after you submit!

You can see more info and complete the trial here: <https://tally.so/r/31JxKg>

Let me know when you submit it and we'll take a look right away since we're in a bit of a crunch!

Best,
Serena

Thank you for your response! I just submitted the form for the trial problem. Please take a look at my submission, and I would appreciate any feedback you could provide.

Hope I will be a great fit for the work you are searching for,

Looking forward to hearing from you soon!

Dear Serena Madam,

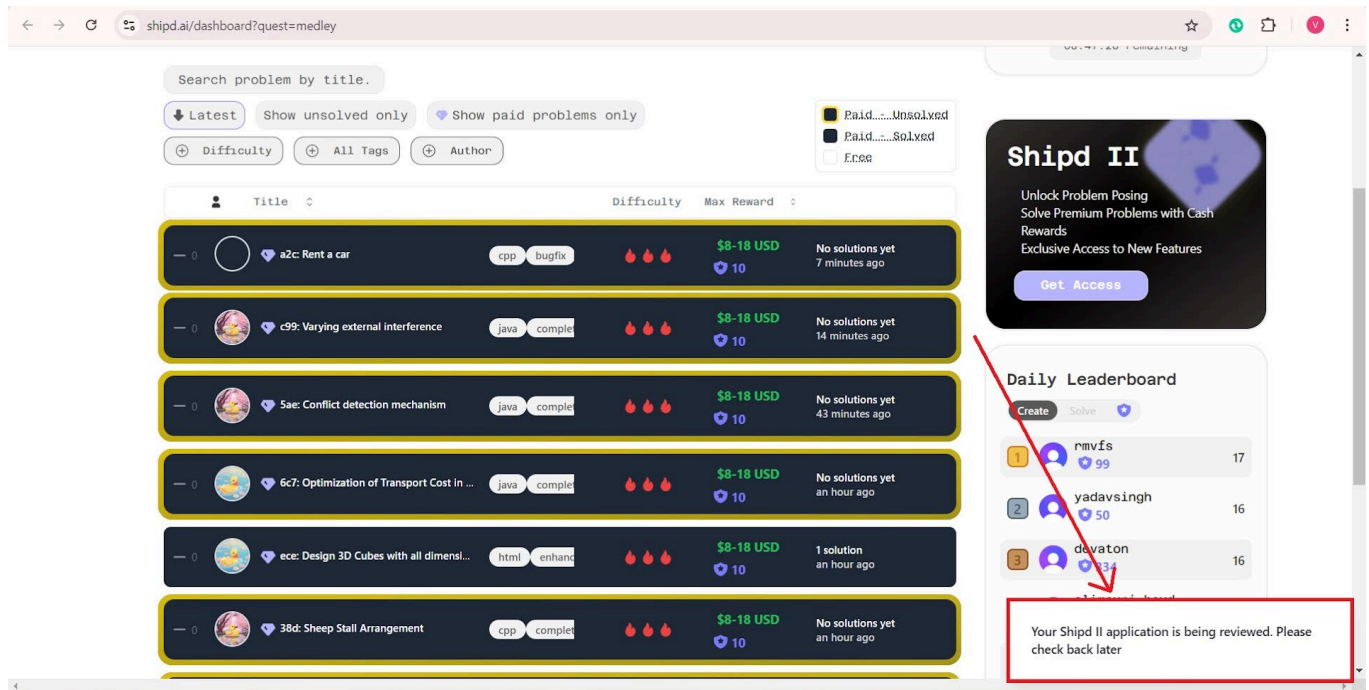

I hope this message finds you well. I recently received confirmation from your team regarding the question I created, which is now ready for submission on the Shipd.ai platform. However, my Government ID verification has been under review for the past 10 days, preventing me from accessing the platform.

I kindly request you that my ID verification process be expedited to allow me access. I am eager to contribute my best by creating and solving problems and look forward to actively participating on Shipd.ai.

Here is a screenshot for your reference.

Warm regards,

Bhadri
