Hey Venkata,

Most devs try to fix bugs, I'm willing to pay you to make them.

We'll run the world's best coding models to fix your bug and if they fail we'll pay you \$100. Your bug will then be used in a benchmark made in collaboration with a top AI lab.

We need 250 datapoints for this benchmark in just 5 days. If you're available now + proficient in Java, TypeScript, or Rust, you're exactly who we're looking for.

Are you up for it?

Daniel Zhang
