Shipd**Hello venkata_nageswara_bhadri,**

Congrats on your submission! A few changes are needed for it to become approveable 

Problem: Feature: Add new functionality that doesn't exist yet**Overall Result:** 0/8 checks passed (0.0%)**Detailed Post Check Output****✖ Problem Test Execution**

Test execution failed: Execution failed: ****Summary:**** Patch application failed — git could not apply test.patch to package.json (patch does not apply at line 10). ****Relevant Logs:**** ```

```
===== Pre-Script: Running
Problem Tests ===== [1/4]
Applying test.patch... → Normalizing patch line endings... ✖ Failed to
apply test.patch error: patch failed: package.json:10 error: package.json:
patch does not apply ``` **Context:** The repo state or package.json no
longer matches the patch (different lines, prior edits, or wrong patch
format/line endings). Next steps: ensure you're on the expected
commit/branch and working tree is clean, inspect package.json and the
patch contents around line 10, regenerate the patch against the current
tree or apply with git apply --reject / manual hunks, and verify CRLF vs LF
normalization.
```

 **Comprehensive evaluation of problem quality, determinism, scope, and difficulty**

Required check 'problem_test_execution' failed

 AI attempts to solve problem to verify it's solvable and appropriately difficult (target: $\leq 20\%$ pass rate)

Required check 'problem_test_execution' failed

 Dockerfile guidelines

Required check 'problem_test_execution' failed

 Test patch format and technical requirements

Required check 'problem_test_execution' failed

 Problem and test quality

Required check 'problem_test_execution' failed

 Problem description and tests align and are good quality

Required check 'problem_test_execution' failed

 Problem description contains only necessary information

Required check 'problem_test_execution' failed

Hello venkata_nageswara_bhadri,

Congrats on your submission! A few changes are needed for it to become approveable 

Problem: Feature: Add new functionality that doesn't exist yet

Overall Result: 0/8 checks passed (0.0%)

Detailed Post Check Output

Problem Test Execution

Test execution failed: Execution failed: ****Summary:**** Patch application failed — test.patch could not be applied to package.json (hunk/context mismatch), causing the script to exit with code 1. ****Relevant Logs:**** ``
===== Pre-Script: Running
Problem Tests ===== [1/4]
Applying test.patch... → Normalizing patch line endings...  Failed to
apply test.patch error: patch failed: package.json:7 error: package.json:
patch does not apply `` ****Context:**** The patch's hunks do not match the
current package.json (different lines/context or file already changed). Next
steps: confirm you're on the correct commit/branch, inspect package.json
around line 7, regenerate or rebase the patch against the current tree, or
run git apply with --reject/--verbose to see rejected hunks.

Problem: Terminal command history and reverse search behave incorrectly

Overall Result: 0/8 checks passed (0.0%)

Detailed Post Check Output

 Problem Test Execution

Test execution failed: Execution failed: ****Summary:**** Patch application failed — git could not apply test.patch because it failed to match package.json (hunk failed / patch does not apply). ****Relevant Logs:**** ``
===== Pre-Script: Running
Problem Tests ===== [1/4]
Applying test.patch... → Normalizing patch line endings... **✗** Failed to apply test.patch error: patch failed: package.json:7 error: package.json: patch does not apply `` ****Context:**** The patch hunks don't match the current package.json (wrong context, file changed, wrong branch, or line-ending differences). Next steps: inspect test.patch and package.json (check around line 7), run `git apply --check test.patch` to see failures, ensure you're on the correct commit/branch, or regenerate the patch against the current file and normalize line endings (or use `git apply --whitespace=fix`).
